## ATTACK NARRATIVE -- KILL CHAIN SUMMARY

The attack originated from 10.0.0.12 targeting the target, gaining initial foothold through exploitation of a network-accessible service. Following injection, the compromised process established a covert C2 communication channel to 45.33.22.11 over HTTPS, with the TLS certificate issued by an unexpected authority -- a hallmark of attacker-controlled infrastructure masquerading as legitimate services. The attack chain represents a complete APT intrusion lifecycle: obfuscated execution, process inj
