ATTACK NARRATIVE -- KILL CHAIN SUMMARY

The attack originated from 185.220.101.47 targeting FINSERV-DB01, gaining initial foothold through exploitation of a network-accessible service. Following injection, the compromised process established a covert C2 communication channel to 91.108.56.130 over HTTPS, with the TLS certificate issued by an unexpected authority -- a hallmark of attacker-controlled infrastructure masquerading as legitimate services. The attack chain represents a complete APT intrusion lifecycle: obfuscated execution, pr
